

Hints from the Model Garage

DRAWINGS BY
RAY QUIGLEY

Holding the trapdoor of a distributor open when you're adjusting the contact points externally can be difficult on late-model General Motors cars with Delco distributors. Here's an easy way to get around the problem: Use masking tape. It does a good job of holding the trapdoor

open while you insert the flexible Allen key and complete the adjustment. A piece of tape about $1\frac{1}{2}$ " long does the trick and leaves both of your hands free for work. Don't neglect masking tape on other jobs, too. It makes a fine "third hand" for all kinds of under-the-hood tinkering.

Old dome-light reflectors are often dull, flaked, or tarnished. Fix yours by cutting a small piece out of the bottom of a store-bought aluminum pie pan, slip this under the bulb bracket, (shiny side down), and refit the glass. A double-folded piece of aluminum foil also works.

Disconnect both battery cables when boost-charging your battery. Otherwise, you may damage transistors, diodes, and rectifiers used in clocks, impulse tachometers, radios, and alternators. Semiconductors can be damaged by "foreign" currents exceeding their own ratings.

save up to \$85

air condition your own car with

COMFY-KIT®

the original install-it-yourself kit

2 models to choose from

super-air

ONLY \$153

COMFY-KIT

ONLY \$143

You can air condition your own car and save up to \$85. Easy step-by-step instruction manual—plus tools (\$8.00 refundable deposit) if you want them. Fits all standard U.S. cars—12 month, 12,000 mile warranty. Can be transferred. You don't have to be a mechanic. Send \$1 for complete instruction package applicable against purchase price. Better yet send \$153 or \$143 for immediate delivery. State: Unit model, size of engine, make, model and year of car.

HOME WORKSHOP ARC WELDER!

ELECTRIC WELD BRAZE, SOLDER, CUT ALL METALS

LIFETIME BURNOUT GUARANTEE & 10 day money back

(if ret'n'd) trial. Works on any 110 volt "Plug in". Welds up to 1/4" steel with 1/16" to 1/8" rods. Special twin pressure type arc torch (shown) develops up to 10,000 deg. heat—HAS A MILLION USES—for **CARS—HOME—FARM—FACTORY**. No experience needed—FREE Welding book tells you how! Thousands of users. **SEND ONLY \$2.00** (cash, Ck, MO) and pay postman \$12.95 COD Pstg., or send \$14.95 for postpaid delivery in USA. COMPLETE ready to use with H.D. Cables. Arc torch rod holder, carbons, welding and brazing rods, flux solder, work clamp and face mask. Compare with any other welder costing up to twice as much! **FREE EXTRA "Dark" eye goggles**—if you order at once, **MIDWAY WELDER**, Dept. DPS-12, Kearney, Nebr.

More Hints from the Model Garage

To turn an engine to an exact point, the best way is to mount a socket and sliding T handle on the bolt that fastens belt pulley to crankshaft. Use a long handle to get lots of leverage for large-displacement engines. The handle makes it easy to work without hitting connections.

You can use color-matched spray to eliminate glare from chrome-plated wiper arms. Pull the wipers off the hubs, remove rubber, sandpaper arms and blades, and clean with solvent. You won't need a primer if you're careful. Spray according to instructions, let dry, and reassemble.
